

ACO SPORT

Pelham High School Birmingham, AL

PROJECT PORTFOLIO

Product:

System 4000 with black plastic ADA grates

The design of the track and field for Pelham High School in Birmingham, Alabama included trench drain around the perimeter of the running track. Concerns over budget and maximizing the life of the track surface needed to be met.

ACO Sport System 4000 was used as an economical solution to fit the school's budget.

The installed trench drain provides a neat, linear finish that followed the track surface and does not distract from the aesthetics of the project.

Additionally, the ADA compliant grates create a safe transition when crossing from the track to the playing field.
