

ACO SPORT

Pineview Recreation Center Lexington, SC

PROJECT PORTFOLIO

Product:

System 4000 with gray plastic slotted grates

The dugouts at the four baseball fields at the recreation center were becoming flooded during heavy rainfall. This would also cause problems for games for the following few days.

ACO Sport System 4000 was used to immediately remove rain water and prevent the flooding issues in the dug outs.

The trench drain also allowed the dugout to be washed down periodically to remove debris and spilled drinks. The ADA compliant plastic grate ensured safety of the players.
