PROJECT PORTFOLIO

Product:

System 4000 with black ADA plastic grates

While renovating the track and field at Spain Park H.S. the architects wanted to incorporate a new drainage system. Two criteria needed to be met when choosing the drainage system. The system must be able to meet the water flow requirements and it had to be aesthetically pleasing.

ACO Sport System 4000 was chosen to meet the needs of this project.

The installed trench drain provides an aesthetic finish while the ADA compliant grates create a safe transition when crossing from the track to the playing field.
