## University of Tampa - Lacrosse field Tampa, FL

### PROJECT PORTFOLIO

#### *Product:*

#### *System 4000 with black plastic ADA grates*

A seven-figure donation from Tampa Bay Rays founding partner Vince Naimoli funded the new athletics and intramural stadium. The stadium has an all-weather turf field that will be used by both lacrosse teams, as well as intramural groups and the ROTC. The lacrosse team previously played on grass at Art and Polly Pepin Stadium, where the University's soccer teams play. Having the new field will help keep both stadiums in better shape.

The new stadium provides seating for 1,450 and two open lawn areas. The field is not surrounded by a track; bringing spectators closer to the action and enhances the fan experience.

System 4000 with sloping channels was chosen to surround the entire field. The 494 black plastic grates are ADA compliant and provide lasting aesthetics.
