***System 4000 with black plastic ADA grates***

To prevent weather related game delays and excessive flooding caused by run-off from the hard paved areas surrounding the baseball field and bleacher seating a drainage system was needed.

ACO Sport System 4000 was selected for use around the dugouts and backstop areas. Plastic ADA compliant grates were chosen to be chemically resistant to any

fertilizers used on the natural turf and the small sized slots would not cause trip problems with the players cleats.

System 4000 is a 1-30 sloping drainage system with neutral channels available in three depths and a choice of lockable grates.
