

ACO SPORT

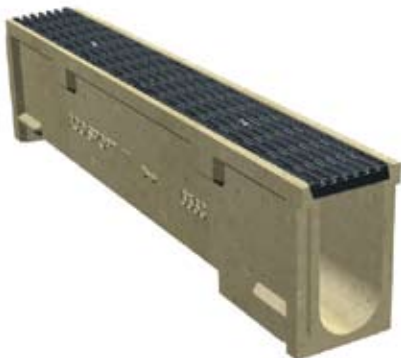

Williston Academy East Hampton, MA

PROJECT PORTFOLIO

Product:

System 4000 with black plastic ADA grates

Williston Academy built a new track & field area to replace their existing facility. The existing track & field had not been able to withstand time, and was not safe for the athletes who used these facilities.

The ACO Sport System 4000 and System 2000 were installed along with new track surfacing to provide a new, safer solution that met the needs of the new facility.

The trench drain provides a neat, linear finish that followed the track surface and did not distract from the aesthetics of the project.

In addition, the black plastic ADA compliant grates create a safe transition for athletes traveling from the running track to the playing field.
