Contractor:

System 4000 with 451Q Stainless Steel Perforated grates
Hunt Construction Group, Phoenix, AZ

When the Chicago Cubs invested in a new Spring Training ballpark in Mesa, Arizona, contractors and designers needed to implement a drainage system to remove rainwater and wastewater from washing the bleacher seating areas. A high capacity and reliable system was required to prevent flooding and damage to the field.

creates a safe transition for athletes and channels are easily accessible for maintenance.

ACO Sport products are designed to maximize the functionality of the athletic facility without disrupting the performance of athletes and players.

ACO Sport System 4000 was selected in this project because it
