we care for water

PORTFOLIO

The Bluffs Flagstaff, AZ

The newly built senior living center, The Bluffs in Flagstaff, Arizona needed to ensure that its residents, visitors, and the facility would remain safe from flooding even during monsoon season.

Project Design Brief

StormBrixx® HD system was installed across the premises. The design is light and does not require heavy machinery or rock for structural support. StormBrixx® HD produced a total of 7,502 ft³, which is enough for the depth restriction and the soil.

Benefits

- Lightweight, simple to install and maintain, ACO StormBrixx® HD will protect the senior living center from floods.
- By enabling inspection cameras or jet nozzles to flow through the manhole, StormBrixx® HD provided ease of access and simplified normal maintenance operations.
