we care for water

PORTFOLIO

Trustile Doors Denver, CO

TruStile Doors is a high-quality maker of interior and exterior MDF, wood, and glass doors for home and commercial usage.

Project Design Brief

The project design called for a stormwater retention system that did not require rock or stone for structural stability. Furthermore, the solution had to provide maintenance access every 50 ft as required by county laws. StormBrixx® HD reduced the total footprint by 40% in comparison to the CMP alternative.

Benefits

- StormBrixx® HD has a 95% void ratio and is light-weight making the system easy to install.
- StormBrixx® HD was designed to be a plastic geocellular product capable of supporting heavy loads in heavy duty applications.
