we care for water

PORTFOLIO

Chicago O'Hare International Airport Chicago, IL

Chicago O'Hare International Airport, often known as O'Hare Airport, Chicago O'Hare, or just O'Hare, is an international airport on Chicago's Northwest Side, 17 miles northwest of the Loop commercial hub.

Project Design Brief

The project's contractor concluded that the parking garage required a drainage system to remove any rainwater runoff that may accumulate during a storm. ACO produced a revised layout drawing to validate that the projected design fulfilled the project specifications. The 6th level required an ADA-compliant trench drain capable of withstanding any mild traffic in and out of the parking garage. The ACO K100 was chosen since it satisfied all of the job's requirements. Approximately 1,128 Type 478Q grates were placed over 1,847 linear feet of K100 channels.

Benefits

- ACO's Type 478Q ADA-compliant grates are fitted in molded galvanized steel edge rails, which add strength and protect the channel body.
