we care for water

PORTFOLIO

Choccolocco Park Oxford, AL

Choccolocco Park leads the industry with its 300+ acre one-of-a-kind, state-of-the-art sports complex in Oxford, Alabama. The park offers cutting-edge baseball, softball, track and field, cross country, and soccer amenities, along with biking trails, and natural resources.

Project Design Brief

During the construction of the new sports facility, engineers discovered that the region is totally flat, has no effective drainage, and is located on a floodplain. A good drainage system was necessary to guarantee that the baseball fields did not have the same problems. The dugouts were designed with ACO's KlassikDrain to keep them safe and clear of pooling water all year round. Over 110 feet of K100 channels were installed with Type 411Q perforated grates.

Benefits

- QuickLok® is a patented boltless locking system that allows for simple grate removal for maintenance. The unique design provides a positive snap-down fit into the locking bar.
