PORTFOLIO

Coosa Street - Downtown Montgomery, AL

Montgomery's historic downtown has recently been transformed. Apart from being the state capital, Montgomery is one of the most historically significant cities in the South, with a diverse impact on history ranging from Jefferson Davies' first pronouncements after the South's surrender to being regarded as the birthplace of the African American civil rights movement.

Project Design Brief

Additional sidewalk drainage was required as part of the redevelopment of the warehouse sector on Coosa Street. The K100 was the perfect solution for the newly built sidewalk, meeting all of the project's specifications. Along with the installation of the K100, ACO's Type 479Q Mosaic ductile iron grates were installed. The Type 479Q grates were chosen to match the surrounding buildings' 1800s ambience.

Benefits

- The 479Q Mosaic Ductile Iron grates with the QuickLok® locking system by ACO meets ADA-compliance and are heel resistant.
