we care for water

PORTFOLIO

Legacy Sports Complex Mesa, AZ

Legacy Park will provide a variety of playing fields and indoor team sports facilities designed with the latest in athletic technologies. This 324-acre private family sports and entertainment complex is a fast-track project that involves construction of full city arterial roadways within a private development, including water, sewer, roadway, drainage improvements, curb, gutter, sidewalk, traffic signals, and landscaping.

Project Design Brief

The pickleball courts' design indicated that an adequate storm water drainage system was necessary to stay up to code and be playable all year, regardless of weather. The KlassikDrain K100 system from ACO was the ideal solution since it met the project's required flow rates. The Type 476D grate, the customer's desired grate type, was placed with 250 linear feet of K100 channels.

Benefits

- The DrainLok locking mechanism grate by ACO is a patented, boltless locking system that removes the need for bolts and bars and improves the hydraulic capacity of the channel.
