

ACO.

we care for water

## PORTFOLIO

### Royal Farms Parkton, MD

A new Royal Farms gas station was being developed for the Parkton neighborhood. A fueling station and RoFo's World Famous Chicken will be located on the six-acre property. It will contain a canopy with six dual-sided gasoline dispensers, allowing up to 12 automobiles to pump gas at the same time.

#### Project Design Brief

To guarantee customer safety, a drainage system was installed during the construction of a new gas station in Parkton. Storm water runoff management is critical because it might carry lubricants and road pollutants that must be cleansed before entering the drainage system. The K100 was selected, and about 390 linear feet of it were put along the gasoline pumping stations.

#### Benefits

- ACO's DrainLok patented boltless locking system provides quick fitting and removal of grates, helping reduce installation and maintenance time and cost.

### ACO Drain®

KlassikDrain K100 with Type 478D  
Longitudinal Ductile Iron Grates
