we care for water

## PORTFOLIO

### Towson University Towson, MD

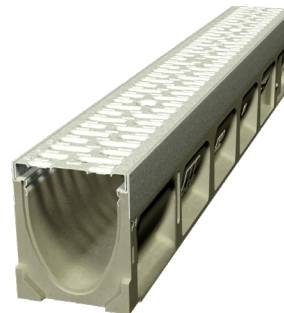

Towson University is a public research university located in Towson, Maryland. Towson University, part of the University System of Maryland, was founded in 1866 as Maryland's first teacher training institution. Since its inception, the university has grown to include eight subsidiary institutions and approximately 20,000 students.

#### Project Design Brief

A drainage system was to be installed in and around the walkway paths as part of the development. The solution required was one that would ensure pedestrian traffic safety without jeopardizing any of the aesthetics. The K100 with Type 460D grates was the ideal solution as it met all the projects requirements. Over 200 linear feet of K100 and over 82 linear feet of K200 channel systems have been installed.

#### Benefits

- ACO DrainLok™ is a patented, boltless locking system that removes the need for bolts and bars and improves the hydraulic capacity of the channel.

### ACO Drain®

KlassikDrain K100 with Type 460D

Slotted Ductile Iron Grates
