

Pipe - Couplings Eccentric Increasesers

Specifications

General
 Used with ACO Pipe System. Provides a eccentric pipe diameter increase from the drain to the sewer, typically used with horizontally laid pipe. Made from AISI 316L. Resistant to thermal and dynamic shocks. Rodent-proof and sag-proof. Non-combustible. Double-lipped seal push-fit connection. Designed for gravity piping system with maximum working pressure of 0.5 bar. Socket clamps, NBR and FPM gasket material also available upon request. Socket clamp can increase maximum operating pressure to 0.7 bar. ACO recommends checking local plumbing codes prior to installation. Manufactured to EN 1124-1 and 1124-2.

Part No.	Length (L1) in (mm)	Length (L2) in (mm)	Diameter (D1) in (mm)	Diameter (D2) in (mm)	Gasket Material	Pipe Material	Weight lbs
